A High Price For High-End Shoes

By Charm Lee

Popular culture and the increasing pressure on women to look sexier have led to the recent surge in demand for cosmetic toe surgery. Women with a desire to slip into the latest designer heels as are Manolo Blahniks and Jimmy Choo's, are demanding their toes be shortened (the second toe for example, which is often longer than the big toe) or their pinky toe to be reshaped simply for the advantage of their feet comfortably fitting into the narrowest of shoes.

Most orthopedic surgeons will recommend foot surgery if a patient has medical reasons for doing so, such as hammertoe. Hammertoe is claw-like, crooked toes that can be either a congenital condition or caused by wearing tight, pointy-toed shoes. The toe is contracted at the middle joint where tightened ligaments and tendons cause the toe to bend and curve downwards. Bunions are usually formed when the protruding part of the toe chafes against the shoe.
